

Your Close Partner in
**Electronics Design and
Manufacturing Services**

UNDER ONE ROOF

About us

VECTOR BLUE HUB is the EMS company placed in Poland who represent the **Under One Roof** concept, keeping the design and manufacturing services in one place to accelerate the time to market (TTM) for your electronic/electromechanics product.

Our business has strong foundations in over 35 years of responsible market activity – always driven by both ambitious business goals and partner relations with our employees and partners (customers and suppliers)

Family Owned Business

Using our longtime knowledge and proficiency enables us to execute on very complex and tough projects. Furthermore, we also always take proper care of cost - as if it was our own product.

Focus on complexity and cost

VECTOR goal:

**Find and sign a STRATEGIC INVESTOR agreement through
a JV or PURCHASE of our EMS business asset.**

**Business alignment and partnership approach are critical for us.
However, time is also of the essence.**

Our numbers

Talented TEAM

ONE place

R&D, Labs

- Software Development
- Software Quality Assurance Engineering
- Hardware Development
- Hardware Quality Assurance Engineering
- Mechanical Development
- Test Development

Production

- Production Process Engineering
- Product Engineering
- Test Engineering
- Quality Assurance

Electronics Design Services

Electronics Design

- Mechanics design
- Electronics design
- Software embedded design

Prototyping

- Engineering validation
- Design validation
- Production validation
- Mechanical rapid prototyping:
CNC, 3D

Tests & Validation

- Electrical
- RF specific
- Optical
- Environmental stress tests

Product Certification

- Worldwide certification
(i.e. CE, FCC, UL)
- In-house preliminary tests
- Laboratory on-site

Electronics Manufacturing Services

Contract Manufacturing

Surface Mount Technology
Through-Hole Technology
Final Assembly & Box Build

**Electromechanical
assembly**

New Product Introduction (NPI)

DFx methodology
FMEA risk analysis
Component lifecycle

Sourcing & Supply Chain Management

Material Resource Planning
Inventory management
Suppliers management

Engineering Services & Product Management

ECO management
Last-time buy management

End-of-life management
